MEETING MINUTES:

Comments from Meeting Participants:

1. From: Isabel Piedmont-Smith – 1108 South Rogers – peidmoni@bloomington.in.gov

I like the idea of the neighborhoods participating in creating mosaics or other sidewalk accents at certain intersections. We have some kids in McDoel who would probably enjoy that.

I like option #2 as a Bump-out Style. I don't like the idea of using the existing planters incorporated into a vertical monument. It would be to big and bulky.

We have a Mcdoel Planter in our yard, and I would not like to be told what to plant in it.

2. Anonymus

Please do not overwhelm the authentic resource (Historic Neighborhoods) with too many "designed elements". I would prefer brick sidewalks to designed aprons, which are not particularly characteristic of older residential neighborhoods and begin to look like every place else.

3. John Allreau – 859-619-2183 – jallreau@indiana.edu

Bus stop on the West side of Rogers between Dodds and Dixie is actually on the Northwest Corner of Dodds and Rogers. It is important to us not to have this moved. Also, no flat spot in this location.

Please suggest less massive monuments for McDoel – Think about reference to Circus?

4. Patrick Murray

At 3rd and Rogers, what if the median stayed in the same location and the south side of 3rd Street got a wider tree lawn. This would help in aligning the sidewalk on the south side of 3rd and help promote an easier East/West Pedestrian Crossing.
